

MIT & UG WORKSHOP

September 10-12, 2023

Massachusetts Institute of Technology, Cambridge, MA

Details of the workshop

The inaugural MIT & UG workshop will take place at MIT. We are currently inviting applications from principal investigators at the UG and MIT working in the broad areas of Energy Transition and Healthy Aging to connect with a cohort of peers, participate in structured experiences following the Catalyst/Impact methodology, and find opportunities to work with one another.

Why you should join us

This workshop will provide a unique opportunity for participants to be among the first members involved in shaping a longer-term structured MIT & UG collaboration. Further, participants will have an opportunity to learn about and experience the Catalyst and Impact methodology to refer trainees to future programs, and participate as a facilitator/mentor in future workshops.

Application details
